Dear Mr. Miller,

Please think of the consequences of the San Jac waste pit contamination spreading further down river. Why would we consider polluting otherwise healthy waters to save our own? The point is for no one to have to live with contaminated water, and a dig and haul would just put the people down river at risk at the expense of getting rid of pollution. A permanent cap protects all of us. Please choose a permanent cap.

Sincerely,

(b) (6)
